## Your Challenge

Now more than ever, to achieve or maintain your organization's target profitability, today's economic climate demands that you **innovate**, **transform**, and **modernize** your business and systems to better satisfy customer needs while boosting productivity.

At Mariner, we understand the demands of recruiting, training, and retaining experienced internal resources to meet these business challenges. Our objective is to allow you to focus on 'your core' business and its key success factors.

## What We Offer

We provide application development and modernization solutions from individual consultants to the planning/delivery of entire IT projects. We have experience in providing advice on strategy, project management, business analysis, and many other specialized IT skills required to successfully execute your business initiatives.

## Application Modernization

Mariner software engineers modernize enterprise application through our proprietary AEM™ process. We have a proven track record in this space having successfully modernized over 1.6 Billion lines of code and 116 languages and databases.

## A Trusted Partner

Mariner is currently considered a preferred technology solutions partner for many clients, from small to very large. Beyond simply providing skill-sets and technologies, we believe that listening to your needs, offering a collaborative engagement model, and our willingness to go the extra mile is what builds and maintains trusted partnerships. Our desire is to offer you nothing less!
